Moxie Energy Chooses Mainsaver

San Diego, CA – September, 21, 2017: Mainsaver Software is pleased to announce it has been chosen as the Enterprise Asset Management Solution for a new 1050MW power generation plant (Freedom Generating Station) owned by Moxie Energy, LLC. The new combined cycle, natural gas fired facility is currently under construction in the Salem Township, Luzerne County, Pennsylvania and will utilize 2 GE combined cycle turbines when fully completed.   The plant is expected to be operational later this year.

Freedom Generation will utilize the full complement of Mainsaver's functionality to manage its Equipment, Preventive Maintenance, Spare Parts Inventory, and Purchasing processes. As part of the solution, the site will also implement Mainsaver Connect, which will provide the ability for Technicians to process work orders and PMs via mobile computers and tablets.

In addition to its extensive footprint and experience in the Power Generation Industry, Mainsaver was chosen due to its demonstrated ability to meet the unique implementation challenges that are often experienced with new, green field construction sites.

About Moxie Energy, LLC

Moxie Energy, LLC was formed to develop, own, and operate clean energy infrastructure projects, and to provide consulting services to the energy industry. Our focus continues to be wide-ranging, from conventional energy sources to new emerging energy technologies.   Moxie Energy specializes in such areas as shale gas, solar power, offshore wind, as well as conventional energy technologies.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
