

## **Cosumnes Power Plant Mainsaver Upgrade**

**San Diego, CA – February 15, 2018:** Nestled in the beautiful farm and ranch community of Herald, Ca, Cosumnes Power quietly and cleanly produces power for the local communities. For several years, the plant has managed maintenance and procurement with Mainsaver Software Asset Management Software. In 2017, the plant upgraded to Mainsaver version 12.8 which offers an updated user interface and the ability to create user specific dashboards. Additionally, Cosumnes has added the Mainsaver Connect module which provides tablet and other browser based device support for work management and material transactions.

Mainsaver is essential in the daily operation of the plant. Operators may enter work requests which are evaluated and approved into work orders. Work orders are prioritized and scheduled. PM work order are generated weekly. Maintenance technicians close work orders and charge out materials as applicable. The system allows for electronic routing and approval of purchase requests and converting those requests into purchase orders.

Cosumnes Power continues to work with Mainsaver Professional Services to review processes and improve their maintenance optimization strategy.

### **About Cosumnes Power**

Cosumnes Power is owned by SMUD (Sacramento Municipal Utility District) and operated by EthosEnergy. Completed in 2006, the 500-megawatt Cosumnes Power Plant in southern Sacramento County generates enough electricity to power 450,000 single-family homes.

### **About Mainsaver**

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
