

Spidex wins Mainsaver CMMS support contract at Dounreay

Spidex Software has announced that it has been awarded the contract for technical support of software management systems for maintenance and health & safety at Dounreay.

Once the UK's centre of fast reactor research, Dounreay is now Scotland's largest nuclear decommissioning project and is recognized as one of Europe's most complex nuclear closure programs.

Spidex Managing Director Jonathan Starling says: "The objective of the software upgrades we will be providing is to support a leaner operating environment within the maintenance function at Dounreay, without compromising any of its efficiency." "We are delighted to be able to supply Dounreay with fully up-to-date software, dedicated technical resources and a UK-based helpdesk for day-to-day assistance. This will be a hugely exciting project for both parties."

About Spidex

Spidex Software Ltd delivers, implements and maintains a leading suite of software solutions, enabling engineering teams across the UK and Ireland to attain best-in-class performance.

About Mainsaver Software

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
