

Empire Generating Co. Integrates Mainsaver to Corporate ERP System

San Diego, CA – September 19, 2018: Mainsaver Software announced today that it will be providing complete integration services for interfacing Mainsaver to a new ERP system at Empire Generation, LLC. Located in Rensselaer, NY. Empire is a gas fired, electric power generation facility that provides electricity to New York. For a number of years, Mainsaver has helped Empire facilitate its business processes, by providing a comprehensive maintenance management and procurement solution.

With the new integrated Mainsaver solution, inventory and purchasing processes will now be even more streamlined, greatly enhancing user efficiency as well as financial accuracy of the operation by eliminating double entry of data in 2 separate systems. The final integrated system is scheduled to be in operation sometime in the fall of 2018.

About Empire Generating Company

The Empire Generating Co. LLC, owns and operates the Empire Generating Facility in Rensselaer, NY. The facility is a natural gas fired plant utilizing GE turbines. At peak operation, the plant produces up to 635 MW of electricity to the state of New York.
