

## Mainsaver to Present at SMRP Phoenix Meeting – June 2019

---

San Diego, CA – February 6, 2018; Rob Garbus, CMRP, from Mainsaver Software will present on Wednesday, June 26<sup>th</sup> at the 2019 SMRP Conference to be held in Phoenix, Arizona. Rob will present, **How Barcodes and QR Codes May be Integrated with Work and Material Management.**

Presentation overview:

We are surrounded by 1 and 2 dimensional (QR) barcodes everywhere in our lives. These ubiquitous codes might be holding a stock number, a work order number, a link to a document, a training video or most any other data. Relative to work management, the most common application of the barcode is for asset, work order and material stock numbers. The barcode is only useful if we have an application that is capable of reading this data usually eliminating manual keystrokes. This presentation will take the user from defining and printing barcode labels to using CMMS and other 'apps' to scan this codes in order to introduce efficiencies into the work management process. Topics covered will include hardware and software, label material and work environment.

### About SMRP

The Society for Maintenance & Reliability Professionals (SMRP) is a nonprofit professional society formed by practitioners to develop and promote excellence in maintenance, reliability and physical asset management while creating leaders in the profession. SMRP provides unparalleled value for individual practitioners and professionals looking to expand their knowledge and skills and build more business connections with others. SMRP is the premier asset management resource for companies looking to improve their processes and procedures. SMRP provides ANSI-accredited certification programs to validate the skills of practitioners and give them an edge when applying for jobs in maintenance and reliability.

Join SMRP's community of over 6,000 members worldwide and take advantage of all of the membership benefits including: international affiliations, domestic public and private partnerships, educational opportunities, the SMRP Library, *Solutions* magazine, networking events around the U.S., local chapters and shared interest groups

### About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
