

Rockaway Power Chooses Mainsaver

San Diego, CA – May 6, 2019: Mainsaver Software is pleased to announce it has been chosen as the Enterprise Asset Management Solution for Rockaway Power Plant, located in Queens, NY. The Rockaway site was originally constructed in 1954 as a coal fired plant, but converted along the way to fuel oil. It has been a natural gas fired plant exclusively since 1994. The site produces up to 110 megawatts of power. The site is owned by Hull Street Energy, LLC after a recent acquisition from NextEra Energy Resources.

Rockaway Power chose Mainsaver due to its extensive footprint and experience in the Power Generation Industry and its demonstrated ability to efficiently implement the Mainsaver system. The facility will utilize the Work Management complement of Mainsaver's functionality to manage Asset Life Cycle and both corrective and preventive Maintenance Programs. A spring-summer 2019 implementation is planned.

About Rockaway Power

Rockaway Power is located in Rockaway, NY and owned by Hull Street Energy. The site produces up to 110 megawatts of power utilizing 2 gas fired generating turbines.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
